PEGASUS TRANSTECH

Kodak i1210 Cleaning Instructions

Your scanner needs to be cleaned during every shift change. It can also be cleaned more often if any of the following conditions occur, your documents do not feed easily, several documents feed at the same time or if streaks appear on your images. After cleaning your scanner you will need to scan the cleaning sheet seen on the last page of this document.

Roller Cleaning

1. Before beginning cleaning procedures, turn off the scanner or disconnect the electrical power.
2. Before opening the scanner cover, be sure the input tray is in the open position and, if the optional output tray and/or dangler are attached, remove them.
3. Press and hold the scanner cover release lever and pull the scanner cover down.

4. With Kodak roller cleaning pads #8535981, wipe the feed rollers from side to side. Rotate the feed rollers to clean the entire surface.

5. Dry the rollers with a lint-free cloth.

Camera Glass Cleaning

1. Wipe the upper and lower imaging area using a Kodak staticide wipe #8965519. Be careful not to scratch the imaging area when cleaning. Allow the glass to dry completely before using the scanner.

2. When you finish cleaning the scanner, close the scanner cover with **both hands.**

Cleaning supplies can be purchased directly from Kodak
